Subject: Community Support

As a voluntary support organisation we already encourage volunteers to spend some time with elderly people. This we try to expand on by asking the immediate neighbour to look in on the elderly person at lunch time and make a cup of tea and a sandwich.

It would be a good idea if social workers also followed suit and lobbied support from the neighbour, we seem to have forgotten how to work as a community and perhaps an advertising campaign by government would help in this direction, and asked local authorities to co-operate.

Hope this helps.
